

## Online Courses to Address Barriers to Student Success

- Alcohol use, sexual misconduct and financial literacy are three major barriers to student success – alcohol/drug use is a contributing factor to sexual assault
- Use of online courses to address alcohol/drug use, sexual assault awareness and financial literacy through interactive modules
- Modules capture data which enables campuses to develop customized approaches to addressing issues specific to their student population
- 500 schools nationally are using the alcohol product
- 200 schools nationally using the sexual assault product
- In Montana, MSU-Bozeman and Montana Tech use both products
- Due to economies of scale, OCHE can purchase all three products and provide to the entire system and community colleges at a reduced rate
- Courses provide us the ability to have a consistent approach and address these issues system-wide
- Assist in the sustainability of our financial literacy education program and address affordability
