ITEM 199-2005-R0322

Request for Approval of University System/Employee Intellectual Property Joint Participation Under MUSP 407 - Kunze; Montana State University

THAT

The Board of Regents of Higher Education approves MSU employee Dr. Anja Kunze to have an equity interest in and to serve as an employee of Neurofluidic Diagnostics. The Board of Regents of Higher Education further authorizes Montana State University to enter into licensing agreements and contractual arrangements with Neurofluidic Diagnostics for use of university facilities, if needed.

EXPLANATION

Dr. Anja Kunze is an Assistant Professor for the Electrical and Computer Engineering Department at MSU. She seeks approval to hold an equity interest in and to serve as an employee of Neurofluidic Diagnostics, established to further develop intellectual property.

Dr. Kunze will work in accordance with a Conflicts Management Plan developed by the MSU Office of Research Compliance. Under Policy 407 and MCA 20-25-109, university employees must have board approval to serve as officers, employees, or members of a governing board of a business entity, or to hold an equity interest in a business entity which has an agreement with, or share ownership of intellectual property with, the university, relating to the development, licensing, or commercial exploitation of that intellectual property. All License Agreements (and possible future licenses as provided for by Option Agreements) issued by the MSU Technology Transfer Office are contingent upon BOR 407 approval.

MSU and MUS will benefit from this approval, including in-state economic development, technical advancements, and collaborative research opportunities for the University and its students.
