***Shared Policy Goals and Accountability Measures for the***  
***Montana University System***  
***2007 Biennium***

This shared policy goals and accountability measures document represents a merging of the following four efforts that have involved leaders from the legislature, the executive and the university system over the past several years:

- 1) Board of Regents strategic goals and objectives
- 2) PEPB performance indicators and policy goals
- 3) The Shared Leadership for a Stronger Montana Economy initiatives
- 4) The University System campus quality measures

The documentation for these four efforts is incorporated by reference into this document in order to provide important background, history and context for these shared policy goals and accountability measures, in particular the shared commitments to quality, to accessibility, to affordability, to workforce development, and to an efficient, effective postsecondary education system.

It is the intention of the PEPB to review and approve this shared document and renew the biennial agreement with the Montana Board of Regents so that this document may become the basis of state public policy in regard to the Montana University System.

As a statement of public policy goals for higher education in Montana, it is important that this document reflects that PEPB is committed to academic quality throughout the Montana University System such that funding a high quality postsecondary education is a critical goal of the State of Montana. It is intended that this document will provide the policy direction from which a quality postsecondary education system in Montana will be maintained.

It is the intent that PEPB will then use this document to move forward with budget initiatives for the 2009 biennium budget, and other policy recommendations during the 2007 biennium interim and into the 2007 legislative session.

***Please note: parenthesis after each performance measure lists the effort from which it was principally derived. E.g. "(2)" means the measure was derived principally from the PEPB indicators from the last biennium. Some performance measures are a combination of more than one effort.***
